Education

University of Central Florida, Computer Science, M.S. **2026 — Expected December 2027**

- GPA: 4.00

University of Central Florida, Computer Science, B.S. **2021 — 2025**

- GPA: 3.64

Experience

Software Engineer Intern, YouROK **February 2026 — May 2026**

- Migrated a legacy PHP backend to a modular Node.js/TypeScript service, redesigning the database schema and implementing a new GraphQL API.
- Containerized services with Docker and built CI/CD pipelines deploying to DigitalOcean.
- Presented progress in weekly team meetings and collaborated with frontend developers to define the new API so their apps could switch over smoothly.

Projects

European Football Stats **October 2025 — Present**

- Shipped an analytics site for Europe's top 5 leagues with live scores, match stats, and lineups.
- Modeled 200+ teams, 3,000+ players, and 35,000+ matches over 20+ years in a relational schema.
- Built a multi-source ETL pipeline using 2 background workers on AWS to update live matches and stats every 30 seconds and import pre-match lineups.

Movie Recs **September 2026 — October 2026**

- Built a film discovery platform with Next.js and PostgreSQL covering 10,000+ films, with filters and recommendations.
- Recommended similar films with AI embeddings that compare theme, genre, and shared cast.
- Added typo-tolerant search and made browsing 95% faster with database indexes.

France Travel Guide **April — November 2025**

- Built a bilingual (French/English) travel site covering 37,000+ French cities and towns using public government data.
- Cached AI-generated city descriptions so repeat visits load 80% faster and cost less.
- Hosted on AWS using Amplify and EC2, with user sign-up and login through Cognito.

Babble **January — July 2025**

- Developed a React/FastAPI translation platform with layout-preserving DOCX/PDF parsing.
- Benchmarked and fine-tuned open-source translation models with HuggingFace, raising quality scores up to 35%.
- Worked on a 5-person Agile team, planning and tracking progress using weekly Jira sprints.

Skills

- **Programming Languages:** Java, Python, JavaScript, TypeScript, C, SQL
- **Frameworks & API:** React, Next.js, Node.js, Express.js, Fastify, FastAPI, GraphQL, Redux, Zod
- **Databases:** PostgreSQL, MySQL, MongoDB, Supabase, pgvector, Drizzle ORM
- **Cloud:** AWS (EC2, VPC, API Gateway, Cloud Map, RDS, Amplify, Cognito), DigitalOcean
- **DevOps & Tools:** Docker, GitHub Actions, Linux (systemd), Git, Vitest, Postman, Jira, pnpm
